JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 222 (1987)

SUBJECT INDEX

Acetonitrile,
electrogenerated chemiluminescence. Part IL. Emission from ——— solutions containing no added luminescors (Ouyang, Bard) 331
Ac polarography,
characteristic criteria for a reversible reaction in ——— (Engblom, Ivaska) 11
Adlattice structure,
——— and hydrophobicity of Pt (111) in aqueous potassium iodide solutions. Influence of pH and electrode potential (Lu et al.) 305
Alternating current polarography,
a systematic approach to faradaic current, charging current and phase angle measurement by digital ——— (Bond, Heritage) 35

Benzimidazobenzophenanthroline polymer,
a ——— molecular transistor fabricated using club sandwich electrodes (Jernigan et al.) 193
Binuclear complexes,
structural consequences of electron-transfer reactions. Part XIV. Fast charge-transfer reactions of ——— undergoing large changes in metal–metal bond lengths (Gennett et al.) 151
Biosensors,
——— using flower petal structures (Uchiyama, Rechnitz) 343
Bond lengths,
structural consequences of electron-transfer reactions. Part XIV. Fast charge-transfer reactions of binuclear complexes undergoing large changes in metal–metal ——— (Gennett et al.) 151

Channel flow-through electrochemical cell,
digital simulation of the ——— . A theoretical study of the determination of solute adsorption on modifies electrodes (Weber) 117
Chemiluminescence,
electrogenerated ——— . Part IL. Emission from acetonitrile solutions containing no added luminescors (Ouyang, Bard) 331
3-[(3-Cholamidopropyl)dimethylammonio]-1-propanesulphonate,
a somewhat unusual desad peak observed with the protein-solubilizing detergent ——— (Kontoyannis, De Levie) 271
Club sandwich electrodes,
a benzimidazobenzophenanthroline polymer molecular transistor fabricated using ——— (Jernigan et al.) 193

Dioxygen,
mechanism of oxidation of ferrous polydentate complexes by ——— (Brown, Mazzarella) 173
Double-layer structure,
——— at the mercury/solution interface with tetrahydrofuran and 2-methyltetrahydrofuran as solvents (Drogowska, Fawcett) 293

Electroinactive species,
kinetics of adsorption of ——— at electrode surfaces. Alternating voltage excitation regime (Ružić) 281
Electron-transfer reactions,
structural consequences of ——— . Part XIV. Fast charge-transfer reactions of binuclear complexes undergoing large changes in metal–metal bond lengths (Gennett et al.) 151
Electron transport dynamics,
——— in thin polymer films containing tris(2,2′-bipyridine)osmium(III/II) complexes (Chen et al.) 223

Ferrous polydentate complexes,
mechanism of oxidation of ——— by dioxygen (Brown, Mazzarella) 173

Flower petal,
biosensors using ——— structures (Uchiyama, Rechnitz) 343
Frumkin–Fowler–Guggenheim type of adsorption,
kinetics of adsorption of electroinactive species at electrode surfaces. Alternating voltage excitation regime (Ružić) 281

Haar Transform,
application of the Fast Walsh–Hadamard Transform and the Fast ——— for electrochemical impedance measurements based on a periodic square-wave perturbation signal derived from Walsh functions (Pospíšil, Fanelli) 367
Heterogeneous electron transfer kinetics,
——— for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte (Petersen, Evans) 129
Hopscotch finite difference algorithm,
propagational inadequacy of the ——— : the enhancement of performance when used with an exponentially expanding grid for simulation of electrochemical diffusion problems (Feldberg) 101

Interfacial admittance,
analysis of the ——— in the case of a two-step two-electron electrode reaction with a diffusing intermediate, with application to the reduction of pyrazine (Rueda et al.) 45

Lead,
electrochemical and spectroscopic methods of characterising ——— corrosion films (Bullock) 347
Linear scan voltammetry,
general equivalence of ——— and staircase voltammetry (Seralathan et al.) 69
Lipid solutions,
on irreversible changes upon heating ——— (Kontoyannis et al.) 277
Long optical path length thin-layer spectroelectrochemistry,
———. Quantitation and potential dependence of electroinactive species (Gui, Kuwana) 321
Luminescors,
electrogenerated chemiluminescence. Part IL. Emission from acetonitrile solutions containing no added ——— (Ouyang, Bard) 331

Mercury,
double-layer structure at the ———/solution interface with tetrahydrofuran and 2-methyltetrahydrofuran as solvents (Drogowska, Fawcett) 293
Gamma-irradiated polymer-modified ——— film electrodes (Kelly, Heineman) 243
Mercury–acetonitrile interface,
heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the ——— using either tetraethylammonium perchlorate or tetraheptylammonium perchlorate electrolyte (Petersen, Evans) 129
2-Methyltetrahydrofuran,
double-layer structure at the mercury/solution interface with tetrahydrofuran and ——— as solvents (Drogowska, Fawcett) 293
Microdisk electrodes,
behaviour of ——— and microring electrodes (Fleischmann, Pons) 107
Microring electrodes,
behaviour of microdisk and ——— (Fleischmann, Pons) 107
Molecular transistor,
a benzimidazobenzophenanthroline polymer ——— fabricated using club sandwich electrodes (Jernigan et al.) 193

Osmium,
electron transport dynamics in thin polymer films containing tris(2,2′-bipyridine)——— (III/II) complexes (Chen et al.) 223
Kinetics of mediated oxidation at electrodes modified by poly(styrenesulphonate) containing tris(2,2′bipyridine)———(III/II) complexes as electron-transfer centres (Jones, Faulkner) 201

Platinum,
adlattice structure and hydrophobicity of ——— (111) in aqueous potassium iodide solutions. Influence of pH and electrode potential (Lu et al.) 305
Poly(styrenesulphonate),
kinetics of mediated oxidation at electrodes modified by ——— containing tris(2,2′-bipyridine)osmium(III/II) complexes as electron-transfer centres (Jones, Faulkner) 201
Potassium iodide,
adlattice structure and hydrophobicity of Pt (111) in aqueous ——— solutions. Influence of pH and electrode potential (Lu et al.) 305

Pyrazine,
analysis of the interfacial admittance in the case of a two-step two-electron electrode reaction with a diffusing intermediate, with application to the reduction of ——— (Rueda et al.) 45

Reversible reaction,
characteristic criteria for a ——— in ac polarography (Engblom, Ivaska) 11
$[Ru(bpy)_2(5,5'\text{-}COOEtbpy)]^{2+}$,
redox series of complexes with a mixed coordination sphere. ——— (Gaš et al.) 161

Simulation analysis,
——— of errors in the measurement of standard electrochemical rate constants from phase-selective impedance data (Milner, Weaver) 21
Solute adsorption,
digital simulation of the channel flow-through electrochemical cell. A theoretical study of the determination of ——— on modified electrodes (Weber) 117
Staircase voltammetry,
general equivalence of linear scan and ——— (Seralathan et al.) 69
Standard electrochemical rate constants,
simulation analysis of errors in the measurement of ——— from phase-selective impedance data (Milner, Weaver) 21

Tetraethylammonium perchlorate,
heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either ——— or tetraheptylammonium perchlorate electrolyte (Petersen, Evans) 129
Tetraheptylammonium perchlorate,
heterogeneous electron transfer kinetics for a variety of organic electrode reactions at the mercury–acetonitrile interface using either tetraethylammonium perchlorate or ——— electrolyte (Petersen, Evans) 129
Tetrahydrofuran,
double-layer structure at the mercury/solution interface with ——— and 2-methyltetrahydrofuran as solvents (Drogowska, Fawcett) 293
1,1,4,4-Tetraphenylbutatriene,
electrochemical reduction of ——— (Chen et al.) 257
Thin-layer spectroelectrochemistry,
long optical path length ——— . Quantitation and potential dependence of electroinactive species (Gui, Kuwana) 321
Tris(2,2′-bipyridine)osmium(III/II),
electron transport dynamics in thin polymer films containing ——— complexes (Chen et al.) 223
Kinetics of mediated oxidation at electrodes modified by poly(styrenesulphonate) containing ——— complexes as electron-transfer centres (Jones, Faulkner) 201

Walsh–Hadamard Transform,
application of the Fast ——— and the Fast Haar Transform for electrochemical impedance measurements based on a periodic square-wave perturbation signal derived from Walsh functions (Pospíšil, Fanelli) 367
